

Leftists are working feverishly to replace

1. Christianity with atheism,
2. the idea that God created people in His image and have rights the government has a duty to protect with the idea that people exist to serve the state,
3. the Protestant work ethic with a commitment to serve the state,
4. private property with centralized planning,
5. personal economic freedom with collectivism,
6. personal and corporate charity with government redistribution of wealth,
7. parental rights with state ownership and control of children,
8. limited government with an all-powerful state that controls everything, and
9. an accurate knowledge and understanding of American history —what really happened — with a distorted version of real events so as to make it easier to manipulate the citizenry.
